- D** - Solar Motor with remote and Rain Sensor.

“ThinkGreen”

There are many environmental benefits of adding skylights to either residential or commercial spaces. Today more than ever architects, builders and homeowners are incorporating “green” products in their designs and renovation projects. Skylights are the single best source of allowing daylight and ventilation to occur due to their overhead location. In the spring and summer, allowing the warm interior air to escape while lighting the space below. During the fall and winter months allowing much needed sunlight while adding warmth to the interior space through the sun’s radiant heat. These are natural benefits of skylights without the use of electricity that would be required with either lighting or mechanical ventilation products.

Our manufacturing facility also operates with the environment in mind; we recycle all of our scrap raw material minimizing the waste going into our landfills. We have also partnered with multiple vendors who share the same philosophy and use recycled (post industrial waste) in the raw material they supply as well as internal recycling programs.

Our Story

Supreme Skylights Inc. located in Ronkonkoma, NY, designs and manufactures the highest quality skylights in the industry. We offer a full line of standard and custom sized skylights to fit most applications. Our products, which are built to last the lifetime of a home, utilize the highest quality materials, energy efficient glazing, and the finest workmanship.

Established in 2006 by individuals with decades of skylight manufacturing and sales experience, the company has grown rapidly. Supreme Skylights Inc. is recognized as a premier skylight brand and is preferred by architects, custom home builders and roofing contractors throughout the Northeast.

With our experienced and knowledgeable staff we will continue to expand our well respected brand and broad product line. It is this commitment to quality, service and dedication to our network of reputable distributors that makes us the “Supreme” choice for all of your skylight needs.
